The Construction of the Removable Shelf with Dividers

Step one: Take three removable shelves and three dividers. With two of the removable shelves, slide-in both dividers on opposite ends of the removable shelves.

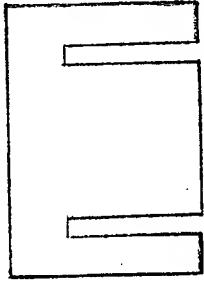

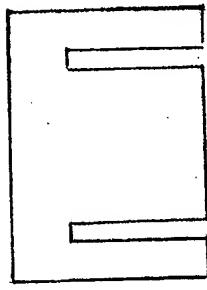

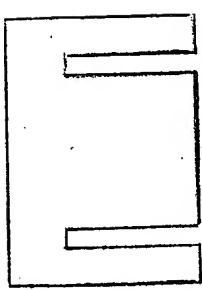

When assembled, a double shelf or stand is formed.

Step two: Using the third divider, slide it into the center of the second shelf. This now connects the third and second shelves to the third removable shelf.

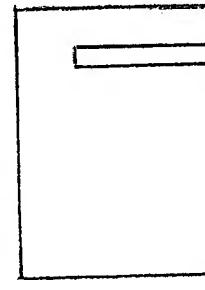

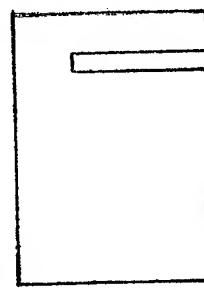

Step three: With the double slotted dividers, slide-in any combination of dividers on the bottom of the removable shelf. With the single slot dividers, slide-in any combination on the top of the removable shelf.

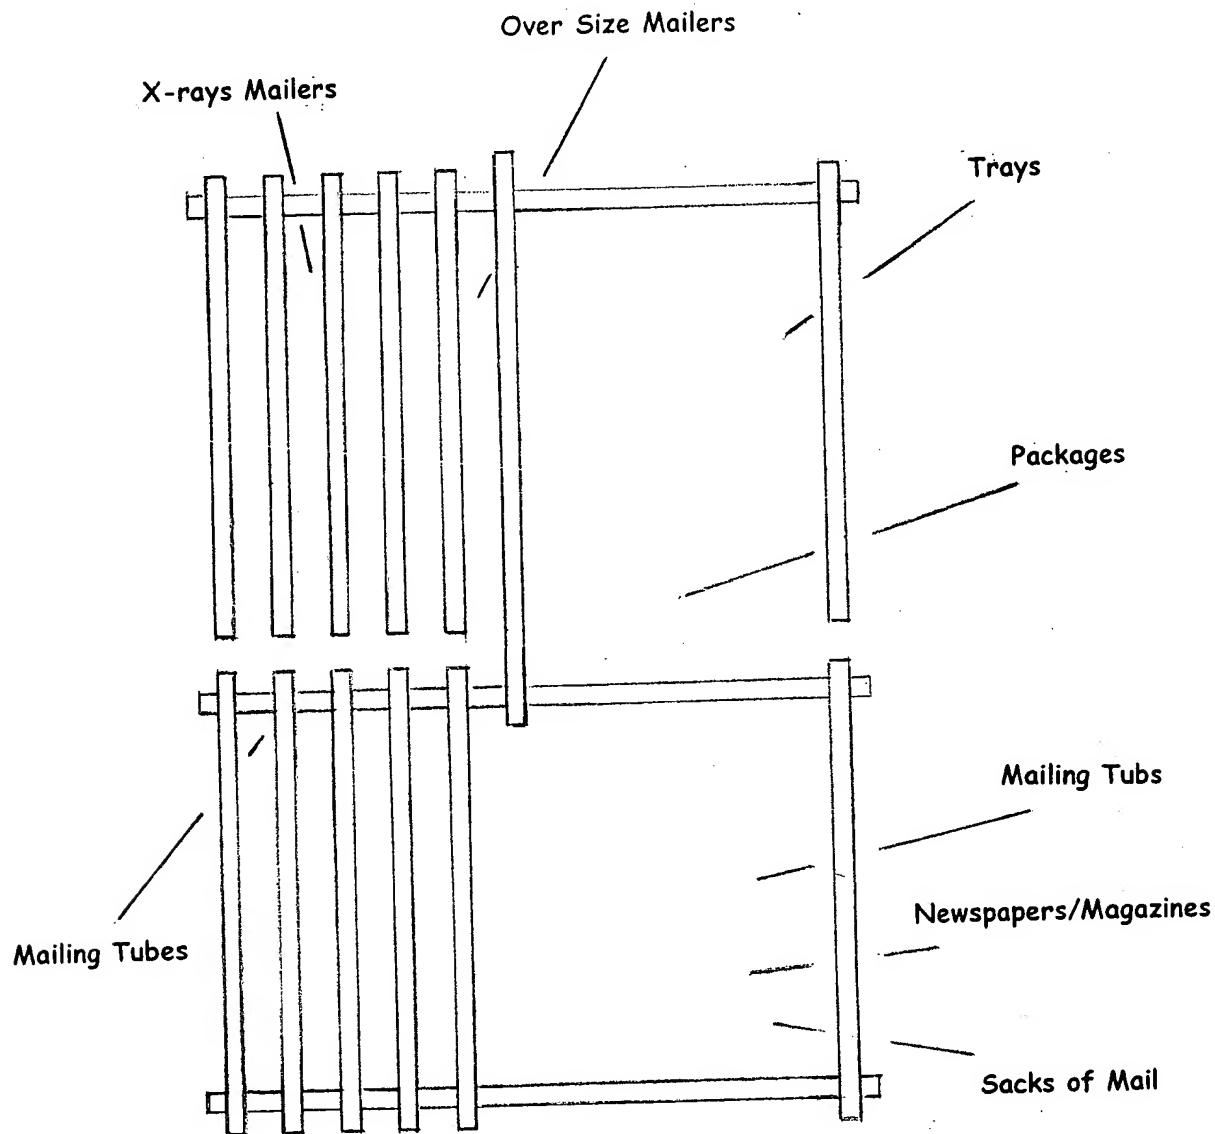

Dividers

Single Slotted Dividers

When individual compartments are made, a wide variety of different mailing materials can be placed in each compartments eliminating wasted space in both mailing containers.
